The cotton market points, the near post of points to a decline to points, the near post points to a decline by rather better cubles, while the late months were off under excellent weather news. Trading was rather quiet at first and the list as a whole showed some steadiness under covering, but soon turned weak under bear pressure and declined to a net less of about 1161s goints, with July leading. At this level a somewhat tetter demand developed from spot houses and exporters and there was a rally that carried July from 11.8cc to 11165c;

Oct., 2.85c to 2.70c, and Dec. from 2.55c to 3.50c. The firmer tone was quickly lost, however, for private advices from the South indicated very little improvement in spot demand, private crop accounts were favorable and estimates for to-morrow's recopts at leading points showed relative heaviness. This caused a renewal of pressure and the market ruled weak during nearly the entire balance of the session, reaching the lowest point a few minutes before the close, when July soid at 11.25c. Once at 5.36c and Dec. at 2.45c and decline of the session, reaching the lowest point a few minutes before the close, when July soid at 11.25c.
